

HOW TO QUICKLY INPAINT BLANK AREAS OF A STRAIGHTENED/CROPPED IMAGE

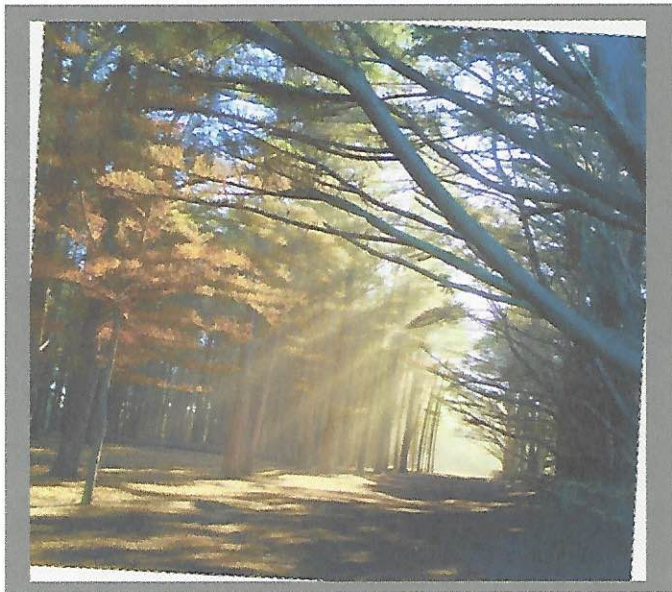

1. Open image, crop and straighten, click Apply. There will be checkered sections at corners of image.
2. With image layer highlighted, click on LAYER>Rasterize and Trim.
3. SELECT>Alpha Range>Select Fully Transparent
4. SELECT>Grow/Shrink. This will open a separate panel. Set the radius at about 2 px so that there won't be a line in the final image.
5. EDIT>Inpaint. Wait for a few seconds for the inpainting process to be completed.
6. SELECT>Deselect. This will stop the marching ants.
7. Save image, either as .afphoto or export as JPG or PNG.

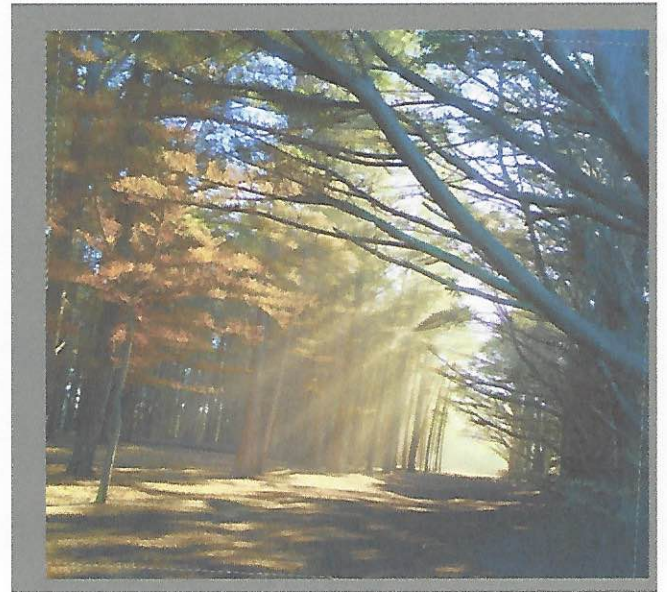

After steps 1, 2, and 3

Step 4

After Step 4, note marching ants are slightly outside image

After Step 5 and before step 6, when the marching ants disappear
